## HOW TO APPLY TO USE THE STANDARDIZED UXO TECHNOLOGY DEMONSTRATION SITES

#### **INITAL REQUEST**

The initial request is designed to start a dialoged between the demonstrator and Standardized UXO Technology Demonstration Site project manager. This initial request should be submitted in the form of the Standardized UXO Technology Demonstration Site Application. This Application should be submitted 60 days in advance.

ATC and USAEC will review the request package when it is received. Once approved, the demonstrator and on-site project manager will schedule the demonstration.

#### THIRTY DAYS IN ADVANCE/SITE USAGE REQUIREMENTS

Thirty days prior to arriving on site, the demonstrator is responsible for supplying the Standardized UXO Technology Demonstration Site project manager three items: Demonstration Test Plan, Quality Assurance/Quality Control (QA/QC) Plan, and Site Safety And Health Plan.

DEMONSTRATION TEST PLAN - The Test Plan is a detailed description of detection/sensor equipment, summary of how data are collected, analyzed, and the decision process by which algorithm discriminates between ordnance and munitions. The test plan should describe objectives and planned use of calibration lanes/ground test pit, blind test grid, and open field sites. The calibration lanes must be completed first, followed by the blind test grid, and last the open field site. No partial scoring is permitted.

QA/QC PLAN - The QA/QC Plan is a description of the demonstrators QA/QC procedures. The QC portion is the description of how systems checks are done by the demonstrator to check on items such as tracking, accuracy, drift, and system performance. The QA portion is the description of the procedures to be employed during the demonstration to include items such as lane spacing, sampling rates, and estimated accuracy of navigation and tracking systems.

SITE SAFETY AND HEALTH PLAN - The Site Safety And Health Plan is intended to be an all inclusive listing of potential Site Safety and Health Concerns that should be considered as part of each demonstration. An outline of a suggested Site Specific Safety and Health Plan is provided but demonstrators must tailor the plan to their specific technologies concerns. Some sections within the suggested plan will therefore not be applicable to all demonstrators but serves as a template to address their specific actions while working at the site.

# APPLICATION FOR THE STANDARDIZED UXO TECHNOLOGY DEMONSTRATION SITE

<b>Demonstrator Name:</b>
Technology Name:
Demonstrator Address:
<b>Demonstrator Main Phone number:</b>
Demonstrator Main Fax number:
Demonstrator Main email address:
POC:
POC Phone number:
POC Fax number:
POC e-mail address:
Site location: APG, YPG
Areas To Be Utilized: (For APG, select from: Calibration Lanes, Blind Test Grid, Mine Grid, Open Field, Moguls, Wooded Area.) (For YPG, select from: Calibration Lanes, Blind Test Grid, Open Field, Inverted Moguls, Desert Extreme Area)
Number of Days Site is Required:
Dates requested:
Prior Visits:
System Description (limit one page):
System Picture:
Data Process Description (limit one page):
Overview of Quality Control (QC):
Overview of Quality Assurance (QA):
Demonstrator's Field Personnel:
Support Equipment Required:

Frequency and Radio Utilization:

### EXPLANATION FOR THE APPLICATION FOR THE STANDARDIZED UXO TECHNOLOGY DEMONSTRATION SITE

Application Should Be Filled In Times New Roman Size 12 Font Information Provided in this Application Will Be Used To Fill Data Points in the Final Report

**Demonstrator Name:** Name of Company or Organization Running Demonstration

**Technology Name:** Name of Technology To Be Demonstrated

**Demonstrator Address:** Full Mailing Address of the Demonstrator

**Demonstrator Main Phone number:** Phone number of the Demonstrator

**Demonstrator Main Fax number:** Fax number of the Demonstrator

**Demonstrator Main email address:** Email address of the Demonstrator

**POC:** Lead POC for the Demonstration

**POC Phone number:** Phone number of the Lead POC

**POC Fax number:** Fax number of the Lead POC

**POC e-mail address:** Email address of the Lead POC

**Site location:** APG, YPG Which Standardized Site is this application addressing

Areas To Be Utilized: (For APG, select from: Calibration Lanes, Blind Test Grid, Mine Grid, Open Field, Moguls, Wooded Area.) (For YPG, select from: Calibration Lanes, Blind Test Grid, Open Field, Inverted Moguls, Desert Extreme Area) What areas is data to be collected from. Note that all demonstrators must utilize the calibration lane before going to the blind grid. All demonstrators must utilize the calibration lane and blind grid before going to the open field.

**Number of Days Site is Required:** How many working days will the vendor be on site. This includes mobilization, demobilization, and actual demonstration.

**Dates requested:** What are the dates that the demonstrator would like to utilize the site.

**Prior Visits:** List previous demonstrations utilizing the technology at any of the standardized sites. Include final report numbers from the demonstration.

**System Description (limit one page):** This description should include information on the type of instrument, (physics, characteristics, dimensions, etc.), specifications for transmit pulses, bandwidths, instrument settings (gains, etc.), description of preprocessing methods (averaging, background subtraction, etc.), measurement units, instrument height, orientation, equipment safety hazards and physical characteristics.

**System Picture:** Paste a picture of the technology to be tested.

**Data Process Description (limit one page):** This section details on the process by which data is collected by the demonstrator. This can include spatial sampling rate, frequency and/or time sampling rate, raw data output format (ASCII, binary), data format, etc. (one page limit)

**Overview of Quality Control (QC):** This section is an overview of the complete QC portion of the Quality Assurance/Quality Control (QA/QC Plan). The QC portion is the description of how systems checks are done by the demonstrator to check on items such as tracking, accuracy, drift, and system performance.

**Overview of Quality Assurance (QA):** This section is an overview of the complete QA portion of the Quality Assurance/Quality Control (QA/QC Plan). The QA portion is the description of the procedures to be employed during the demonstration to include items such as lane spacing, sampling rates, and estimated accuracy of navigation and tracking systems.

**Demonstrator's Field Personnel:** The Site Personnel list containing the names of people the demonstrator is planning to bring on-site. Each individual role and responsibility during the demonstration must be described. Note: Each individual needing access to the site will be required to provide information such as social security and driver licenses numbers to gain access to the military installation. Foreign nationals will need to submit a site visit request through their respective embassies. Access to the Standardized Site will be coordinated with the individual site manager.

**Support Equipment Required:** List all equipment, vehicles, and expendables to be brought onto the site by the demonstrator. Storage needs for these items should also be identified. List any logistics, support equipment, or special needs that the demonstrator will request to the site manager.

**Frequency and Radio Utilization:** In this section, provide a listing of frequencies and power of EM/FM and radio (including Differential GPS) equipment to be utilized at the site. This information is used to coordinate and determine RF interference to or from the host installation.
